# WE ARE

# WHERE

You will find Nordic Dispenser products across the entire globe. The company is represented in 35 countries.

# YOU ARE .....

Our operations are based in Sandviken, a small community nestling amidst a region of the middle of Sweden.

# ENVIRONMENTAL FACTS

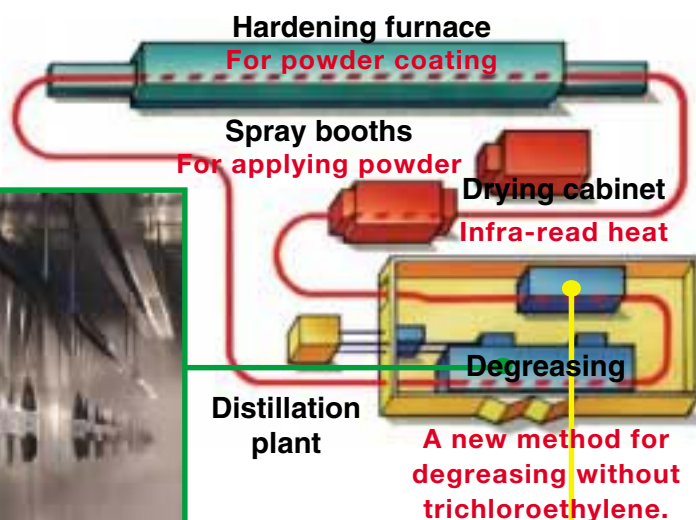

We have paid special attention to evaluating the environmental impact of the various production methods and materials available to us during the development of this product. Our overriding aim has been to ensure that we, as manufacturers, do everything we can to minimise the environmental impact of the product.

- We are the first in the world to use a by-product of the sugar processing industry as a cleaning liquid. This safe, environmentally friendly liquid is vegetable-based, derived from renewable sources and fully biodegradable.
- We use solvent-free powder lacquer.
- All the individual components in the product are recyclable.
- Product packaging is marked as recyclable.

## FIRST IN THE WORLD ...

The production process calls for cleaning and degreasing all metal components before lacquering. At one time the environmentally hazardous solvent trichloroethylene was used for this process.

GLT-Laserstans AB decided to replace this degreasing agent with a safe, environmentally friendly and biologically renewable cleaning liquid consisting of ethyllactate, a by-product of the sugar processing industry. Once the liquid has been used, it can be cleaned using distilling apparatus and then reused.

Its name is Purasolv. It is a solvent with a high boiling point and a slow evaporation rate, and breaks down biologically in 48 hours. The waste products are ethanol and lactic acid.

In the USA, Purasolv is a food additive approved by the American authorities FDA, Food & Drug Administration and is used in certain skin care products.

This project is typical of GLT:s longterm environmental work.

# PRODUCT SPECIFICATIONS

## ERGONOMICS

Our professional quality tape dispensers are lightweight and easy to hold, with ergonomically designed grips for ease of use and comfort even during long hours of operation. They are also versatile, practical and easy to load.

## AMENDMENTS

We reserve the right to make constructional improvements to our products without prior notification.

## QUALITY

Nordic Dispenser's production has been ISO 9002 certified for many years. Our quality assurance policy includes an undertaking to constantly improve product and delivery quality.

## PRODUCT CODING SYSTEM

Our entire product range is supported by an extensive spare parts service.

At additional cost, customer's can also order dispensers in their own company colours or with their company logotypes.

Please use the following codes for non-standard colours or when ordering optional extra equipment. Please contact us direct for details of price. Please see last page for contact information.

EXAMPLE

**ND 2140\*\*232**

COLOUR OF METAL COMPONENTS WHICH ARE NOT ELECTRO-GALVANISED	
0 =	NATURAL FINISH OR NO METAL COMPONENTS
1 =	BLUE LACQUER
<b>2 =</b>	<b>RED LACQUER</b>
3 =	BLACK LACQUER
4 =	GREY LACQUER
6 =	WHITE LACQUER
7 =	YELLOW LACQUER

COLOUR OF PLASTIC COMPONENTS	
0 =	NO VISIBLE PLASTIC COMPONENTS
1 =	BLUE
